MACHINE LEARNING

TOPIC: PREDICTION OF RAINFALL

NAME : CHELLUBOINA JYOTHI SWARUP

REG NUMBER : 39110220

SCOPE:

- In Today's time a dangerous atmospheric deviation is influencing all around the world which significantly impact on humanity and cause the facilitate the adjustment of environment.
- Rainfall prediction now days is an arduous task which is taking into the consideration of most of the major world-wide authorities.
- In current, Unpredictable and accurate rainfall prediction is a challenging task. We apply rainfall data to different machine learning algorithms and compare the accuracy of classifiers.
- Our motive is to get the optimized result and a better rainfall prediction.
